Investor Presentation

Safe Harbor Statement

This presentation contains forward-looking statements concerning approved products and our product development, our technology, our competitors, our intellectual property, our financial condition and our plans for research and development programs that involve risks, uncertainties and assumptions. These statements are based on the current estimates and assumptions of the management of Cumberland Pharmaceuticals as of the date of this presentation and are subject to uncertainty and changes in circumstances. Given these uncertainties, you should not place undue reliance upon these forwardlooking statements. Such forward-looking statements are subject to risks, uncertainties, assumptions and other factors that may cause the actual results of Cumberland Pharmaceuticals to be materially different from those reflected in such forward-looking statements.

Important factors that could cause actual results to differ materially from those indicated by such forward-looking statements include, among others, those set forth under the headings "Risk factors" and "Management's discussion and analysis of financial condition and results of operations" in our Form 10-K and Form 10-Q Reports on file with the SEC. The Company does not undertake any obligation to release publicly any revisions to these statements to reflect events forward-looking or circumstances after the date hereof or to reflect the occurrence of unanticipated events. All statements contained in this presentation are made only as of the date of this presentation. For more information on our brands, including full prescribing and safety information, please see the links to the product websites which can be found at www.cumberlandpharma.com.

Company Overview

- Specialty pharmaceutical company
 - Portfolio of eight FDA approved products
 - Promoted by two national sales forces
- Several near-term catalysts for new growth opportunities
 - Vibativ post-acquisition integration and market expansion
 - Next Generation Caldolor product
 - RediTrex methotrexate product line
- Four Phase II products in development with upcoming study milestones
- Proven record of successful product development and product acquisition
- Strong financial position and positive net cash flows from operations

Marketed Brands

HOSPITAL

Acetadote[®] (Acetaminophen Toxicity)

Caldolor[®] (Pain and Fever)

Vaprisol[®] (Hyponatremia)

Vibativ[®] (HABP/VABP & cSSSI)

GASTROENTEROLOGY

Kristalose[®] (Acute/Chronic Constipation)

K

Omeclamox[®]-Pak (H. pylori)

ONCOLOGY

Ethyol[®] (Amifostine)

Totect[®] (Dexrazoxane)

- IV treatment for acetaminophen overdose
- Developed and registered by Cumberland
- Acetaminophen is the leading cause of poisoning in the U.S.*
- Acetadote now standard of care
- Cumberland offers both Brand and Authorized Generic
- Favorable court rulings upholding patents
- Maintaining significant market share

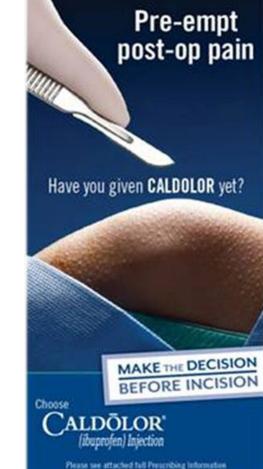

*National Poison Data System, American Association of Poison Centers

CALDŌLOR®

- Patented, injectable formulation of ibuprofen
- Developed and registered by **Cumberland**
- First injectable approved in the US for pain & fever
- Unresolved pain remains leading cause for hospital readmissions, with a total market potential of over 700M units*
- Significant data supports pre-op management of inflammation
- Pediatric labeling approved by FDA and launched
- Next Generation product approved and prepping for launch

rcleding Bowd Warning

*Symphony Source Health

- Unique crystalline formulation of lactulose
- Prescription strength laxative
- Clinically proven increases in patient satisfaction
- Acquired from Mylan Laboratories
- Repositioned to reflect branded status
- New pricing allowed co-pay support
- Expanding Managed Care coverage

- Re-launch of an FDA-approved oncology hospital brand
- Protects against the harmful effects of cancer treatments
- Protects the patient's healthy tissue, not the tumor
- Indicated for use with head & neck and ovarian cancers
- Growing interest for use in additional areas

Commercial Portfolio Expansion Strategy

IDENTIFY Late Stage Candidates

EXPAND Existing Products

ACQUIRE Under-Promoted, Approved Brands

DEVELOP *Early-Stage Candidates*

PRODUCT PORTFOLIO

Acquisition Initiative

GOAL TO ADD ONE NEW PRODUCT PER YEAR

through business development initiative or internal product development

Active, ongoing initiative to identify, evaluate and acquire/license new products into the portfolio

Source opportunities through direct efforts and
 intermediaries

Seek commercial and late stage development assets that fit our strategy and focus

- Branded, Rx products in hospital acute care or gastroenterology
- Sales of **\$5-25 million or larger** with attractive margins

- Acquired Vibativ[®] from Theravance in November 2018
- Financial terms included:
 - \$20MM upfront payment
 - \$5MM milestone payment in 2019
 - Double-digit royalty on future net sales
- Transaction included the global responsibility for the product
- FDA-approved product with favorable margins

- Injectable antibiotic that treat serious, life-threatening infections
- Hospital product that aligns well with our current infrastructure
- Strong potential to **continue brand growth**
- Patent protection through 2027
- Established network of worldwide licensing partners

RediTrex

- New delivery of methotrexate designed for the treatment of various forms of arthritis
- Exclusive U.S. rights through a long-term partnership with the Nordic Group (based in Europe)
- Widely used throughout Europe with a strong brand presence
- The U.S. methotrexate market is seeing significant growth
- FDA submission filed and accepted for review

lfetroban Overview

- A **potent**, **selective** antagonist of thromboxane receptor (TPr)
- Initially developed by Bristol-Myers Squibb as an anti-platelet agent
- Safety is well-established in 26 clinical studies with over 1,300 subjects
- Cumberland is collaborating with Vanderbilt, Harvard, Scripps and other academic centers
- Cumberland successfully manufactures both IV and oral formulations

Rationale for Ifetroban

Ifetroban Inhibits The Thromboxane Receptor (TPr):

- Antagonist of smooth muscle contraction, platelet aggregation, and inflammation
- New data also demonstrates impact on fibrosis
 - → Hepatorenal Syndrome: Renal Vasoconstriction, Liver Inflammation, & Fibrosis
 - → Aspirin Exacerbated Respiratory Disease (AERD): Airway Constriction, Vasoconstriction, & Cellular Infiltration/Inflammation
 - → Systemic Sclerosis: Vasoconstriction, Autoimmune Inflammatory Process, & Fibrosis
 - → **Portal Hypertension:** Endothelial Dysfunction, Liver Fibrosis, & Inflammation

Ifetroban Development Pipeline

Existing Safety Profile of >1,300 Patients

Hepatoren[®] (hepatorenal syndrome)

Boxaban® (aspirin-exacerbated respiratory disease)

Vasculan[®] (systemic sclerosis)

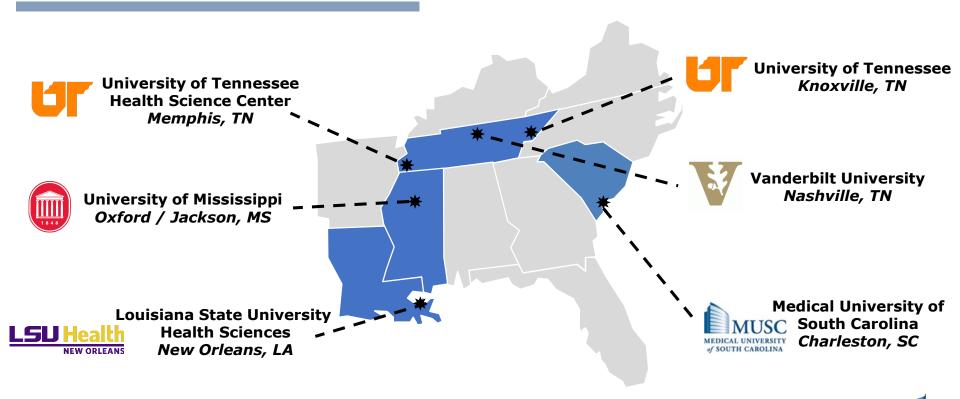

Portaban[®] (portal hypertension)

Phase II Study Data is Next Milestone

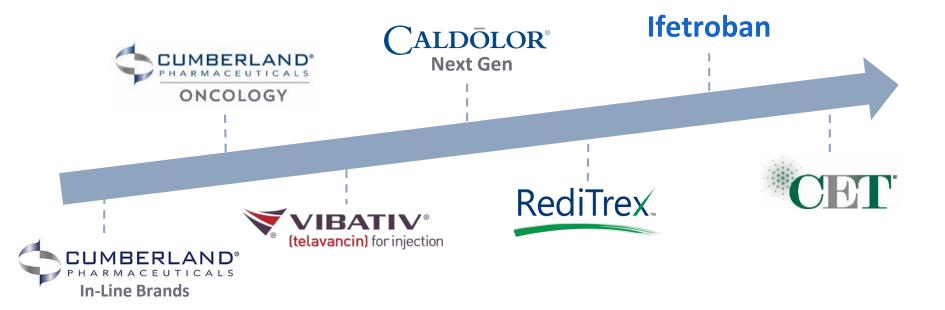

Anti-inflammatory Anti-fibrosis

Expanding Our Product Portfolio

Deploying a Multifaceted Strategy to Create Value

Cumberland Moving Forward

Diverse product portfolio with 8 FDA approved brands

Proven development and commercialization capabilities

 \checkmark

Four Phase II products in development with upcoming study milestones

Strong financial position with positive net cash flows from operations

Valuation gap given assets, cash, sales, and pipeline

PHARMACEUTICALS

Investor Presentation

Appendix

- IV treatment for hyponatremia
- Patented, branded hospital product
- Delivered in a pre-mixed bag
- Promotes free water secretion in hospitalized patients suffering from an imbalance of sodium and water levels
- Condition results from a variety of critical care conditions including ICU, neurology, nephrology, & oncology
- Acquired from Astellas

H. pylori Treatment for patients with duodenal ulcer disease

	Omeclamox*-Pak	PrevPac®	Pylera®
Number of Prescriptions/Co-Pays	1/1	1/1	2/2
Days of Therapy	10	10-14	10
Doses Per Day	2	2	4
Pills Per Day	8	8	14
Total Pill Burden	80	112	140

- Newest treatment for Helicobactor pylori (H. pylori) a frequent cause of stomach ulcers
- A triple therapy brand
 - Omeprazole (Prilosec)
 - Clarithromycin
 - Amoxicillin
- Requires fewer pills than other products that treat H. pylori
- Shorter course of therapy enhances compliance

- FDA-approved oncology hospital brand
- Indicated to treat toxic effects of extravasation (leakage) associated with anthracycline chemotherapy
- Can limit damage from extravasation and enable patients to continue treatment
- Anthracyclines are widely used in the treatment of breast cancer, soft tissue sarcomas and lymphomas

Co-Promotional partnership to **expand medical specialties covered** in support of Kristalose

International Bringing our medicines to patients throughout the world through a growing network of distinguished international partners Distribution Partners Europe Asia

DBPharm Korea

Sandor India

28

Hepatoren[®] in HRS

- Patients with HRS have severe multi-organ dysfunction
- No FDA approved treatment for this unmet medical need
- **Orphan Drug candidate**, with an estimated patient population of 175,000

- Cumberland has completed initial Phase IIA study
 - Ifetroban was well-tolerated across all doses with no safety concerns
 - Showed signals of improved kidney function

Boxaban[®] in AERD

- Chronic condition characterized by asthma, sinus infections and nasal polyps
- No FDA approved treatment for this unmet medical need
- Potential Orphan Drug candidate

- Cumberland has completed initial Phase IIA study
 - Ifetroban was well-tolerated with no safety concerns
 - Showed signals of efficacy and improved respiratory function

Vasculan[®] in SSc

- Chronic, life-threatening multi-system autoimmune
- Highest death rate of any autoimmune disease
- No FDA approved treatment for this unmet medical need
- **Orphan Drug candidate**, with an estimated patient population of 165,000
- Cumberland is currently conducting an initial Phase IIA study

Portaban[®] in PH

- The most serious complications of liver cirrhosis
- Median survival is 6 years from diagnosis
- **No FDA approved treatment** for this unmet medical need
- Orphan Drug candidate, with an estimated patient population of 100,000
- Patient enrollment completed in Phase IIA study
 - Top line results show ifetroban to be safe and well tolerated

Reconciliation of Net Income to Adjusted Earnings
